

```
#include <iostream>

using namespace std;

int main()
{
    int x1,x2;

    cout<<"Enter the position of Dev : ";

    cin>>x1;

    cout<<"Enter the position of Shahil : ";

    cin>>x2;

    if(x1>x2){

        cout<<"Sahil will meet Dev";

    }

    else{

        cout<<"Sahil will not meet Dev";

    }

    return 0;

}
```

```
Enter the position of Dev : 7
Enter the position of Shahil : 1
Sahil will meet Dev
```
